No. 1

A SELECTED BIBLIOGRAPHY ON TORONTO'S PORT AND WATERFRONT

Roy Merrens
November 1989

This selected bibliography is intended to serve as a guide to the diversity of material pertaining to Toronto's port and waterfront that has been produced in recent years by a variety of people, including scholars, journalists, architects, planners, engineers, etc. Most of the items listed are available, either in their original form or in reproduction, in the Canada Ports Collection of the Map Library in the Scott Library of York University (a collection which is temporarily housed in the offices of the Royal Commission on the Future of the Toronto Waterfront); items not available in this Collection may be located elsewhere in the York University library system. Suggestions for additions and corrections will be welcomed by the author.

This bibliography is substantially larger and more comprehensive than previous editions. The compilation of this revised version has been facilitated by the efforts of Monica Morrison and Charity Landon at the Canadian Waterfront Resource Centre, established by the Royal Commission on the Future of the Toronto Waterfront.

1. ACRES CONSULTING SERVICES LIMITED. *Keating Channel environmental assessment: main report*. Toronto: The Metropolitan Toronto and Region Conservation Authority, March 1983.

2. AINLAY, Philip W. "A locational analysis of waterfront industries in Toronto." Unpublished B.A. thesis, Department of Geography, York University, October 1978.
